EDUCATION

VNR Vignana Jyothi Institute of Engineering and Technology

Hyderabad, India

Bachelor of Technology in Computer Science and Engineering – CGPA: 8.85/10

November 2022 – May 2026

EXPERIENCE

Power Intern | Infosys

January 2026 – April 2026

- Built a PIKE RAG pipeline with hierarchical retrieval for financial PDF Q&A using FastAPI and LangChain.
- Implemented multimodal extraction with PyMuPDF and vLLMs for tables, charts, and visual content, leveraging ChromaDB for vector storage and achieving 80% better retrieval accuracy vs. traditional RAG.

Machine Learning Engineer Intern | Fluition Sphere

June 2025 – August 2025

- Engineered a transaction classification model using BERT and DBSCAN, achieving 97% accuracy.
- Built a Dockerized FastAPI microservices backend and React frontend with Redis/Celery for async email retrieval, RESTful APIs, and a PostgreSQL database for automated financial insights.

PROJECTS

Trade Pulse Tracker | [Project Link](#)

Node.js, React, Apache Kafka

- Ingested 50 K live stock ticks/sec via a Node.js TCP listener into Kafka, ensuring strict ordering guarantees.
- Established an API latency monitoring system recording P50/P95 metrics to InfluxDB, equipped with a React dashboard and automated email alerts to provide actionable trading intelligence.

Ai Feedback Analyzer | [Project Link](#)

BERT, PyTorch, Node.js

- Fine-tuned DeBERTa-driven authenticity and sentiment classifiers in PyTorch, optimized via Monarch Butterfly Architecture on a 200K-sample curated dataset to attain 88% accuracy.
- Utilized React frontend, Node.js backend, and Gradio interfaces to power an interactive review analytics solution.

Fediverse Aggregator | [Project Link](#)

Node.js, Redis, Docker, React

- Created a React and Node.js full-stack platform leveraging ActivityPub to fetch distributed Fediverse posts, aggregating content and rendering nested reply threads.
- Developed a PostgreSQL database for threaded comment hierarchy, employed Redis with BullMQ for caching and asynchronous task handling, and containerized services with Docker for isolated environments.

SKILLS

Programming Languages

Python, Java, C++, SQL

Machine Learning & AI

TensorFlow, PyTorch, LangChain, Deep Learning, NLP

Web Development

React.js, Node.js, FastAPI, MongoDB

Cloud & Deployment

AWS (EC2, S3), Docker, Redis, Kafka

Soft Skills

Problem-Solving, Team Collaboration, Strategic Thinking, Adaptability

ACHIEVEMENTS

- Achieved a 3-star rating on CodeChef with a 1603 rating.
- Presented on “Data Collection and Machine Learning in Smart Transportation” at ICAMADA.
- Secured 3rd place in the startup competition organized by the ED Cell of VNRVJIET.

CERTIFICATES

- Amazon ML Summer School 2024 Acknowledgement (Amazon) | [CERTIFICATE](#)
- Machine Learning Specialization (DeepLearning.AI) | [CERTIFICATE](#)
- ICAMADA Research Paper Presentation (NRSC, ISRO) | [CERTIFICATE](#)
